

2026/215

30.1.2026

COMMISSION REGULATION (EU) 2026/215

of 29 January 2026

amending Annexes II and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for dimoxystrobin, ethephon and propamocarb in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1), point (a), Article 18(1), point (b), and Article 49(2) thereof,

Whereas:

- (1) For dimoxystrobin, ethephon and propamocarb, maximum residue levels ('MRLs') were set in Annex II to Regulation (EC) No 396/2005.
- (2) The approval of the active substance dimoxystrobin was not renewed by Commission Implementing Regulation (EU) 2023/1436 ⁽²⁾. All existing authorisations for plant protection products containing that active substance have been revoked. No MRLs based on Codex maximum residue limits ('CXLs') or import tolerance requests exist for dimoxystrobin. It is therefore appropriate to delete the MRLs set out for that active substance in Annex II to Regulation (EC) No 396/2005 in accordance with Article 17 of Regulation (EC) No 396/2005 in conjunction with Article 14(1), point (a), thereof. MRLs for all products should be set at the product-specific limit of determination ('LOD') in Annex V to that Regulation. In addition, as the MRLs on all products should be set at the product-specific LODs, there is no longer a need for confirmatory data. Therefore, all footnotes containing requests for confirmatory data should be deleted.
- (3) The approval of the active substance ethephon was renewed by Commission Implementing Regulation (EU) 2023/2591 ⁽³⁾. In the framework of the renewal of the approval of ethephon, the European Food Safety Authority (the 'Authority') on 31 January 2023 published a conclusion proposing to lower the existing acceptable daily intake ('ADI') from 0,03 mg/kg to 0,02 mg/kg bodyweight per day. Consequently, the Authority was asked to review ⁽⁴⁾ all MRLs for ethephon based on the lowered ADI. In addition, the Authority proposed a new residue definition for enforcement in cereals as 'sum of ethephon free and conjugates, expressed as ethephon' instead of the currently applicable residue definition 'ethephon'. The Commission considers this new residue definition to be appropriate.

⁽¹⁾ OJ L 70, 16.3.2005, p. 1, ELI: <http://data.europa.eu/eli/reg/2005/396/oj>.

⁽²⁾ Commission Implementing Regulation (EU) 2023/1436 of 10 July 2023 concerning the non-renewal of the approval of the active substance dimoxystrobin, in accordance with Regulation (EC) No 1107/2009 of the European Parliament and of the Council, and amending Commission Implementing Regulation (EU) No 540/2011 and Commission Implementing Regulation (EU) 2015/408 (OJ L 176, 11.7.2023, p. 10, ELI: http://data.europa.eu/eli/reg_impl/2023/1436/oj).

⁽³⁾ Commission Implementing Regulation (EU) 2023/2591 of 21 November 2023 renewing the approval of the active substance ethephon in accordance with Regulation (EC) No 1107/2009 of the European Parliament and of the Council and amending Commission Implementing Regulation (EU) No 540/2011 (OJ L, 2023/2591, 22.11.2023, ELI: http://data.europa.eu/eli/reg_impl/2023/2591/oj).

⁽⁴⁾ European Food Safety Authority: Statement on targeted review of the maximum residue levels (MRLs) for ethephon (*EFSA Journal*, 22(4), e8757).

- (4) The MRLs for ethephon in walnuts, blueberries, pineapples, barley, rye and wheat⁽⁵⁾ are based on revoked CXLs and should be reconsidered. The Authority identified revised MRLs, except for blueberries for which no additional data is available. Therefore, it is appropriate to maintain the MRL for walnuts and to lower the MRL for pineapples in Annex II to Regulation (EC) No 396/2005. It also concluded that concerning the MRLs for barley, rye and wheat, some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. In addition, it could not be excluded that the acute reference dose ('ARfD') of ethephon would be exceeded in blueberries. The MRL for blueberries should be lowered in Annex II to Regulation (EC) No 396/2005 to the LOD.
- (5) The MRLs for ethephon in hazelnuts/cobnuts, cherries, figs, table olives, kaki/Japanese persimmons, tomatoes, and olives for oil production, should be maintained in Annex II to Regulation (EC) No 396/2005 at the current level.
- (6) The Authority further concluded that concerning the MRLs for pears, table grapes, wine grapes, cotton seeds, muscle, fat, liver, kidney and edible offals other than liver and kidney (swine, bovine, sheep, goat, equine, poultry, and other farmed terrestrial animals), milk and birds eggs, some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (7) In addition, the MRL for ethephon in plums should be maintained in Annex II to Regulation (EC) No 396/2005 at the current level based on the use authorised in France notified during the decision-making process.
- (8) In addition, the Authority found that it could not be excluded that the ARfD of ethephon would be exceeded in apples. Consequently, risk managers proposed to set a lower MRL for apples based on the less critical and safe fall-back Good Agricultural Practices ('GAP'). It is therefore appropriate to lower the existing MRL for ethephon in apples in Annex II to Regulation (EC) No 396/2005.
- (9) For propamocarb, the Authority published on 24 November 2023 a reasoned opinion on modification of the existing maximum residue level in honey⁽⁶⁾. In its reasoned opinion, the Authority found that it could not be excluded that the ARfD would be exceeded for lettuce. The Authority published on 26 May 2025⁽⁷⁾ a statement where an MRL based on the less critical and safe fall-back GAP which is fully supported by data was proposed. It is therefore appropriate to lower the MRL for propamocarb in lettuce in Annex II to Regulation (EC) No 396/2005.
- (10) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain LODs. For all the active substances covered by this Regulation those laboratories proposed product-specific LODs that are analytically achievable.
- (11) Through the World Trade Organisation, the trading partners of the Union were consulted on the modified MRLs and their comments have been taken into account.
- (12) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (13) To allow for the normal marketing, processing and consumption of products, this Regulation should not apply to products which have been placed on the market in the Union before the modified MRLs become applicable and for which information shows that a high level of consumer protection is maintained. This is the case for all products except for ethephon in or on apples and blueberries, and for propamocarb in or on lettuces.

⁽⁵⁾ Joint FAO/WHO food standards programme Codex Alimentarius Commission. REP16/PR, Appendix III. Thirty-Nine Session. Rome, Italy, 27 June-1 July 2016.

⁽⁶⁾ European Food Safety Authority: Reasoned opinion on modification of the existing maximum residue level for propamocarb in honey (*EFSA Journal*, 21(11), e8422).

⁽⁷⁾ European Food Safety Authority: Statement on the MRL for propamocarb in lettuces (*EFSA Journal*, 2025;23:e9455).

- (14) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to adapt themselves to the requirements which result from the modification of the MRLs.
- (15) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes II and V to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

Article 2

Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which have been placed on the market in the Union before 19 August 2026, except for ethephon in or on apples and blueberries and for propamocarb in or on lettuces.

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 19 August 2026.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 29 January 2026.

For the Commission
The President
Ursula VON DER LEYEN

Annexes II and V to Regulation (EC) No 396/2005 are amended as follows:

- (1) Annex II is amended as follows:
- (a) the columns for ethephon and propamocarb are replaced by the following:
Pesticide residues and maximum residue levels (mg/kg)

Code number	Groups and examples of individual products to which the MRLs apply ⁽¹⁾	Ethephon (R)	Propamocarb (Sum of propamocarb and its salts, expressed as propamocarb) (R)

(+) Pesticide-product combination for which a footnote exists. The list of footnotes is provided below.

Ethephon (R)

(R) The residue definition differs for the following combinations pesticide-code number: Ethephon - code 0500000: Sum of ethephon free and conjugates, expressed as ethephon
The European Food Safety Authority identified some information on the relevance of conjugates at PHI longer than 12 days as unavailable. The Commission will take into account the information referred to in the first sentence, if it is submitted by 30 January 2028, or, if that information is not submitted by that date, the lack of it.

0130020 Pears**0140040 Plums****0151010 Table grapes****0151020 Wine grapes**

The European Food Safety Authority identified some information on the aneugenic potential of the metabolite HEPA as unavailable. The Commission will take into account the information referred to in the first sentence, if it is submitted by 30 January 2028, or, if that information is not submitted by that date, the lack of it.

0401090 Cotton seeds**0500010 Barley****0500070 Rye****0500090 Wheat****1016010 Muscle****1016020 Fat****1016030 Liver****1016040 Kidney****1016050 Edible offals (other than liver and kidney)****1030010 Chicken****1030020 Duck****1030030 Geese****1030040 Quail**

The European Food Safety Authority identified some information on the aneugenic potential of the metabolite HEPA and metabolism study in lactating ruminants (goats) as unavailable. The Commission will take into account the information referred to in the first sentence, if it is submitted by 30 January 2028, or, if that information is not submitted by that date, the lack of it.

Propamocarb (Sum of propamocarb and its salts, expressed as propamocarb) (R)

(R) The residue definition differs for the following combinations pesticide-code number: code 1000000 except 1016000, 1030000 and 1040000: N-oxide propamocarb; codes 1016000 and 1030000: N-desmethyl propamocarb

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 22 March 2016, or, if that information is not submitted by that date, the lack of it.

- 0241020 Cauliflowers**
- 0251010 Lamb's lettuces/corn salads**
- 0251030 Escaroles/broad-leaved endives**
- 0251040 Cresses and other sprouts and shoots**
- 0251050 Land cresses**

(+) Pesticide-product combination for which a footnote exists. The list of footnotes is provided below.

Dimoxystrobin (R)

(R) The residue definition differs for the following combinations pesticide-code number: Dimoxystrobin — code 1000000 except 1040000: 505M09, expressed as dimoxystrobin.

Metabolite 505M09 = 3-({2-[(1E)-N-methoxy-2-(methylamino)-2-oxoethanimidoyl]benzyl}oxy)-4-methylbenzoic acid'
